We need your input for a survey!

The Return to Play survey is an initiative of the IFSPT with the assistance of Cardiff University. A few minutes of your time will help us compile information on how practitioners make decisions about advising athletes on returning to sport and physical activity following injury (RTP). We particularly want to know whether RTP decisions differ across countries, sports, level of competition and level of practitioner expertise. This information will help us in the next stage, which aims to develop some clinical guidelines for Physical Therapists working in sport. **The results of this survey will be presented at the RTP world congress in Bern (20.–21.11.2015)! <https://cardiff.onlinesurveys.ac.uk/rtp-survey>**
